About me

My career began as a student of Information Systems Engineering, until I found my true passion by immersing myself in the world of programming. What started as a casual interest turned into passionate dedication as I discovered the power of creating solutions through code.

Additionally, my keen interest in hardware adds another exciting dimension to my career. I am always excited to learn about the latest technological innovations and how they can transform our reality.

Expand my knowledge in HTML, CSS, SASS, Workflows, JavaScript, Fetch (Previously AJAX), PHP, OOP - MVC, MySQL - SQL and API's.
